

COMPANY

We are integrators of technical systems and solutions in the field of electrical, HVAC, plumbing and automation installations for industry, infrastructure and tertiary sector. We develop long-term projects that have a major impact on the regions and the quality of life of their inhabitants. Our activities essentially respond to an ambition for overall performance - not only technical, economic and financial, but also social, societal and environmental - which leads us to integrate these challenges into all our projects.

Mission and values

At TIAB, we develop solid concepts, implement solutions and services at high standards and combine modern technologies with our expertise of over 70 years, to build the future together.
